

ENERGIZE YOUR CAREER

WITH TAILORED ENERGY CAREER TRAINING
& JOB COACHING SUPPORT

Interested in an Energy Career?

We provide job seeking support and skills that can lead to careers such as:

- Heating, Ventilation and Air Conditioning technician
- Electrical technician
- Plumber assistant/technician
- Contractor administrative/office staff/sales
- Contractor project management
- Insulation technician
- High performance construction, building envelope construction
- Lighting technician
- General contractor

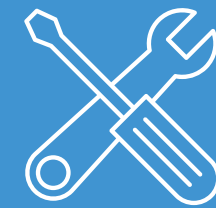

These jobs typically start at \$18-23/hour. You can try out a job for 160 hours at \$18/hr. You and your job host will determine if there is a good fit for a long-term position in the company.

How it Works

- Technical training in energy efficiency and electrification
- Coaching to create a compelling application, cover letter, and resume
- Apply for a position and interview with SEI and potential training employer
- Receive pay, liability & worker's comp insurance coverage, and ongoing career coaching support from SEI
- When nearing completion of training, you'll get help to secure a job placement with your current employer or other energy industry employer
- Thrive in a high-wage, high-growth green career!
